

## Medaval rating of Blood Glucose Meters recommended by the Dutch quality and safety testing company TÜV Rheinland Nederland

Monitors are listed according to clinical validation.

Devices without evidence of validation include those without either a published paper proving validation or evidence of possible MDR equivalence to a validated device. Medaval will update devices where scientific proof of validation or MDR equivalence is provided.

**Warning:** Blood glucose meter accuracy requires strict adherence to manufacturer instructions. If the procedure is not followed correctly, the results can be very inaccurate.
